SUMMARY

Laravel Developer with 2+ years of hands-on experience building and maintaining web applications using Laravel, PHP, MySQL, JavaScript, Blade, and REST APIs. Experienced in eCommerce, POS & inventory systems, CMS platforms, authentication, RBAC, database design, API integration, and production deployment

WORK EXPERIENCE

Web Manager — OPEA (Rafiq Center), Gojra

Oct 2023 – Aug 2026

- Managed and maintained the company's Laravel-based eCommerce website.
- Identified design, functionality, and usability issues and worked with the development team to troubleshoot and resolve them.
- Reported and reproduced website bugs and collaborated with developers to troubleshoot and resolve functionality issues.
- Managed SEO, website analytics, tracking, and technical requirements.
- Improved website performance, organic visibility, and overall user experience.

Freelance / Personal Laravel Projects

2023 – Present

- Developed multiple Laravel applications including eCommerce, POS & inventory, learning platforms, job portals, and business applications.
- Implemented authentication, role-based permissions, database relationships, CRUD systems, REST APIs, and frontend integrations.
- Worked on deployment, production troubleshooting, and web application development using Laravel, PHP, MySQL, JavaScript, and basic React.js.

Junior Full Stack Developer — BriskBase Software House, Gojra

Oct 2022 – Sep 2023

- Developed Laravel-based web applications using PHP, MySQL, Blade, JavaScript, and REST APIs.
- Implemented backend functionality, database relationships, CRUD modules, authentication, and frontend integrations.
- Collaborated with senior developers to troubleshoot bugs and deliver production features.
- Assisted with deployment, configuration, and maintenance of web applications.

TOP PORTFOLIO PROJECTS

E-commerce Platform

Built and deployed a Laravel eCommerce platform covering product/variant management, checkout, payments, order processing, inventory, notifications, and role-based administration.

Tutorials Platform

Developed and deployed a Laravel-based learning platform with course and tutorial management, blog/CMS functionality, role-based permissions, and SEO-focused features. Deployed on Hostinger.

Point of Sale & Inventory System

Developed a Laravel-based POS and inventory management system featuring product, supplier, purchase, and sales management, automatic stock updates, profit-margin-based pricing, role-based access control, and sales, purchase, inventory, and profit reporting.

ImperialRide.ae

Designed and developed the frontend from scratch and contributed to backend implementation, improving the booking flow, responsive design, usability, and overall website performance.
